INTELLIGENCE ANALYST

OSINT | Threat Assessment | Risk Analysis | Protective Intelligence | Online-to-Offline Risk

Intelligence Analyst supporting protective intelligence, threat monitoring, complex investigations, alert triage, and travel/event risk assessment in global security environments. Experienced producing SITREPs, threat advisories, travel briefs, event risk assessments, geospatial products, and decision-ready intelligence from fragmented open-source reporting. Background includes terrorism-related OSINT research with the Global Terrorism Database, political violence analysis, source evaluation under uncertainty, and nonpartisan criminal justice and public safety policy analysis.

CORE SKILLS

Protective Intelligence | Structured OSINT | Investigative Analysis | Link Analysis Methodologies | Online Threat Monitoring | Alert Triage | Source Evaluation | Escalation Analysis | Travel & Event Risk | Violent Extremism Analysis | SITREPs & Threat Advisories | Geospatial Analysis | Stakeholder Briefing

RELEVANT EXPERIENCE

Risk Intelligence Analyst

Prosegur – Global Risk Services | Lowell, MA | Jan 2026–Present

Embedded analyst within a Fortune 500 corporate security program, delivering structured OSINT, investigative support, threat monitoring, and risk intelligence across protective intelligence, online safety, travel risk, and global security operations.

- Serve as the team's lead analytics resource for ad hoc reporting, dashboard development, and operational analysis, translating stakeholder questions into structured datasets, visual summaries, and actionable reporting.
- Analyze online and open-source discourse for behavioral and reputational risk signals, including fixation, grievance narratives, protest mobilization, hostile surveillance behaviors, and escalation indicators.
- Triage, validate, and prioritize incoming alerts by severity, credibility, relevance, and potential impact to support timely escalation of high-risk incidents.
- Produce SITREPs, threat advisories, travel briefs, event risk assessments, and stakeholder summaries that synthesize fragmented reporting into clear, decision-ready intelligence.
- Support protective intelligence, travel risk, event security planning, incident response, and situational awareness through monitoring global events and online risk indicators.
- Develop Excel dashboards and Power BI-ready workflows using Ontic case management and public-source data to identify recurring risk patterns, improve visibility, and support consistent investigative reporting.
- Standardize analytics and reporting workflows to improve process consistency, repeatability, and efficiency across recurring intelligence products and operational analysis.
- Create geospatial intelligence products using GeoJSON, Datawrapper, and Google My Maps to assess event routes, road closures, client locations, and transportation impacts for protective intelligence operations.

Perpetrator Identification Intern, Global Terrorism Database

National Consortium for the Study of Terrorism and Responses to Terrorism | College Park, MD | Jun 2022–Aug 2022

- Conducted structured OSINT and perpetrator-identification research to verify and contextualize violent extremist incidents, reconciling conflicting reporting across 100+ sources weekly under strict validation criteria.
- Analyzed and coded incident- and perpetrator-level information into structured dataset variables, supporting consistent documentation and large-scale analysis of political violence trends.
- Assessed perpetrator behaviors, targeting patterns, and escalation dynamics across fragmented reporting to support reliable analysis of terrorism and violent extremism.
- Applied disciplined source evaluation and analytical judgment when working with incomplete, contradictory, or sensitive information to establish accurate, defensible findings.

Legislative Financial Analyst (Executive Offices & Criminal Justice)

Office of the Legislative Fiscal Analyst, Utah State Legislature | Salt Lake City, UT | Jan 2023–May 2024

Served as assigned analyst to the Executive Offices and Criminal Justice appropriations portfolio, supporting nonpartisan fiscal and policy analysis on criminal justice, public safety, courts, corrections, law enforcement, and executive branch agencies.

- Authored fiscal notes for 127 bills, assessing cost impacts, validating assumptions, identifying inconsistencies, and translating quantitative information into clear written analysis for legislators and senior staff.
- Evaluated criminal justice and public safety legislation by balancing fiscal modeling with qualitative context, communicating tradeoffs, downstream impacts, and implementation considerations under tight deadlines.
- Developed SQL queries and reporting tools to improve fiscal forecasting, expenditure tracking, data reliability, and decision support within internal budget systems.
- Maintained confidentiality and analytical discipline when evaluating politically sensitive policy proposals and coordinating with legislators, agencies, and committee staff.

Data & Evaluation Assistant

International Rescue Committee | Salt Lake City, UT | May 2022–Nov 2022

- Developed Excel and Power BI dashboards to support program monitoring, evaluation, and internal/external reporting.
- Validated datasets, improved data entry guidance, and handled sensitive program information with accuracy and objectivity.
- Synthesized quantitative findings into clear analytical summaries for grant reporting and organizational decision-making.

Teaching Assistant, Social Science Research Methods

University of Utah Political Science Department | Salt Lake City, UT | Sep 2021–May 2023

- Supported instruction in quantitative research methods and statistical analysis, guiding students in hypothesis development, model selection, and interpretation of results.
- Evaluated research for methodological rigor, statistical validity, and logical consistency, reinforcing structured thinking, evidence-based assessment, and decision-making under uncertainty.

ADDITIONAL EXPERIENCE

Teaching Assistant, U.S. National Government | University of Utah Political Science Department | Aug 2019–May 2021

Supported instruction on U.S. political institutions, policy tradeoffs, analytical writing, evidence-based reasoning, and governance.

Earlier Field Operations Experience | Utah Political Campaigns | 2018–2020

Supported data-driven field operations, voter data tracking, structured information collection, targeted outreach, and reporting under time-sensitive conditions.

EDUCATION

Master of Science, Political Science / International Relations | University of Utah | 2024

Graduate training in advanced quantitative methods, research design, political violence, conflict dynamics, and security analysis.

Graduate Certificate, Public Policy | University of Utah | 2024

Professional Certificate, Data Analytics | Utah Valley University | 2022

Bachelor of Arts, Middle Eastern Studies and Arabic | University of Utah | 2014

Includes immersive Arabic study at Yarmouk University, Irbid, Jordan.

Honors: Fulbright-Hays Scholarship, Yarmouk University Summer Arabic Program; Cum Laude

TOOLS & METHODS

Investigations & Intelligence Platforms: Ontic, Maltego Graph, Factual, Everbridge VCC, International SOS, Vismo

Investigative Methods / OSINT: Structured OSINT, Investigative Analysis, Source Evaluation, Alert Triage, Link Analysis Methodologies, Investigative Documentation, Intelligence Reporting

Data & Analytics: Excel, SQL, R, Power Query, Power BI, Tableau, Stata, SPSS, Python (Foundational)

Geospatial / Mapping: GeoJSON, Datawrapper, Google My Maps, GIS tools

Workflow / Knowledge Management: Microsoft Teams, SharePoint

Languages / Regional Background: Arabic language training; Middle Eastern Studies background; Turkish coursework/familiarity

PROFESSIONAL DEVELOPMENT

University of Michigan | PostgreSQL for Everybody Specialization (Coursera) | Completed 2026

Maltego Academy | Completed 2026

Professional training in link analysis methodologies, graph-based investigations, and OSINT workflows using Maltego Graph.
